## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

2. Group I, claim(s) 31-53, 61 and 64 drawn to a method of populating a circuit board.

Group II, claim(s) 54-60, 62 and 63, drawn to a reflow oven.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claims 54 or 53 are either obvious over or anticipated by EP 0802010, EP 0469788 and US 6493928 accordingly, the special technical feature linking the two inventions, printing solder paste on an area of a solder contact surface, heating or reflowing with a heat or energy feed emerging from an oven and effecting soldering of the connection wire of the THT-component with said surface does not provide a contribution over the prior art, and no single general concept exists. Therefore, restriction is appropriate.

Art Unit: 1793

3. Applicant is advised that the reply to this requirement to be completed must include an election of invention to be examined even though the requirement be traversed (37 CFR 1.143).
